

functional specification

FR016 — sources/functional_specification.md

Masterclass source package snapshot

Functional Requirement	FR-016
Edition	Engineering Learning Academy — Source Package snapshot
Status	**Complete / Frozen / Accepted** — learning proof only (**GO AS LEARNING
Audience	Academy generation and study (snapshot; SoT remains authoritative)
Document type	Source package snapshot (PDF)

Faithful rendering of a regenerable Masterclass source snapshot. Do not hand-edit; regenerate via python scripts/build_masterclass_package.py. Repository documentation remains the source of truth.

Contents

FR-016 Multi-Agent Orchestration

Phase: Horizon 1A Stage 10

Status: Complete / Frozen / Accepted — learning proof only (**GO AS LEARNING PROOF ONLY**); prefer `cic agent run` for ordinary preparation; Engineering Learning Academy ready ([acceptance](#); [eval/fr016_m4_evaluation.md](#); [ADR-008](#)).

(Originally planned as FR-015; renumbered 2026-08-05.)

Only after bounded agents (FR-015) are reliable — **FR-015 is complete and frozen**.

Approved purpose (owner): constrained learning milestone in production multi-agent engineering, and architectural substrate for future permission-separated capabilities (e.g. Job Discovery). Do **not** claim strong near-term commercial value.

Topology: Deterministic Orchestration Supervisor (DOS) + frozen BOPA + read-only Operational Briefing Specialist (OBS); typed handoffs; DelegationPolicy + per-specialist ToolPolicy; deterministic default; optional LLM propose only behind policy. Prep/Truth/Review persona splitting is **rejected as multi-agent theatre**.

Package: `career_intelligence.multi_agent` (distinct from FR-008 `orchestration` and FR-015 `agent`).

Acceptance Criteria

- ✓ Pattern choice is justified in an ADR or engineering note. → [ADR-008](#); [M0](#).
 - ✓ Specialists have distinct tools/context boundaries. → M1 registry + OBS vs BOPA allow-lists ([eval/fr016_m1_orchestration_contracts.md](#)).
 - Loop detection and stop conditions remain enforced across agents. → Contracted in M1; **enforced in M2 runtime** (corpus I/J + limits).
 - ✓ M2 go/no-go evidence (DOS/OBS value, complexity, continue vs defer). → **GO AS LEARNING PROOF ONLY** ([eval/fr016_m2_supervisor_runtime.md](#)).
 - M3–M4 minimal owner surface / freeze only if owner requests learning close-out. → **M3 complete; M4 complete** — FR-016 **Complete / Frozen** ([acceptance](#); [eval/fr016_m4_evaluation.md](#)).
-
