

functional specification

FR018 — sources/functional_specification.md

Masterclass source package snapshot

Functional Requirement	FR-018
Edition	Engineering Learning Academy — Source Package snapshot
Status	**Complete / Frozen / Accepted
Audience	Academy generation and study (snapshot; SoT remains authoritative)
Document type	Source package snapshot (PDF)

Faithful rendering of a regenerable Masterclass source snapshot. Do not hand-edit; regenerate via python scripts/build_masterclass_package.py. Repository documentation remains the source of truth.

Contents

FR-018 Opportunity Discovery & Acquisition

Phase: Horizon 1B (lead)

Status: **Complete / Frozen / Accepted** ([eval/fr018_opportunity_discovery_acquisition.md](#); [ADR-010](#); Academy [masterclass/FR018/](#))

(Inserted 2026-08-07 — changelog § 1.115. M0–M4 + live close-out: § 1.116–1.125. Extends the FR-008 acquisition adapter boundary additively; does not reopen FR-008–FR-017. Synonym in older notes: Job Discovery. Architecture: permanent Opportunity Acquisition Framework — channels as adapters under FR-018.)

Discover and acquire suitable job advertisements into CIC via lawful source adapters, with explicit provenance and idempotent handoff into the frozen FR-008/FR-009 Opportunity path. Owner review before apply remains mandatory. Prefer APIs, feeds, alerts, exports, and owner URLs over browser automation.

M0 architecture (accepted): thin Discovery Ingress (resolve → `AcquisitionAdapter` → existing `ApplicationWorkflowRunner` only); Opportunity sole durable SoT; **URL-first** first executable path; email/feeds later; Playwright last-resort / not near-term.

M1 delivered: typed discovery contracts; provenance validators; DiscoveryIngress Protocol; ADR-010.

M2 delivered: `UrlAcquisitionAdapter`, `ThinDiscoveryIngress`, `cic opportunity discover`; SEEK/LinkedIn/Indeed locator support with offline fixtures; definite idempotency; fail-closed unsupported/blocked/network. Live board HTTP may fail — paste/export remain available. No Playwright.

M3 delivered: SEEK production-ready URL path; OS trust-store TLS (`truststore.SSLContext`); LinkedIn/Indeed evidence-based fail-closed (no Playwright / anti-bot bypass); no new boards.

M4 delivered (accepted): Email job-alert channel — owner-saved SEEK / LinkedIn / Indeed `.em1` → `EmailAcquisitionAdapter` → optional **URL enrich** via existing `UrlAcquisitionAdapter` when the alert is card-only → ingress → Horizon 1A; `cic opportunity discover-email`. Digests expand to one Opportunity per job URL. Email is a **discovery** mechanism; the job URL acquire path remains the authoritative advertisement source when enrichment succeeds. No IMAP, no recruiter CRM, no Playwright. Recruiter Intelligence is **FR-019+**.

Do not reopen without explicit owner request.
